

Pce. Augustus

Apr. 19 1791

Dear Sir

In the last Letter you received from Mr de Harzheim He promised I would write to you this Post and in consequence send you these Lines. It was my Intention already some time ago to write but always in hopes of getting a Letter from you dear General I put it off from Day to Day. However as our Departure is drawing near I must once more from here to recal myself to your Memory. A More Salutary Winter I could never have spent as this. The Climate, The Quietness of the Place and All the Kindnesses I have received from my Dear Parents during my Stay here have contributed greatly towards my Recovery. The very happy, Footing

both I and Mr de Hanstein lived upon together has not  
 a little contributed towards keeping me in that state  
 of Mind the most proper for my situation. When the  
 Mind is occupied and uneasy the Physics can not have  
 that Effect on the Body as when it is at Ease. In  
 my Opinion It is the Happiest Winter I have ever  
 spent yet and you can not think Dear General  
 how grateful I feel myself towards the Almighty  
 for this innumerable kindneses towards me during  
 this Winter. With a little Care I hope soon to be  
 entirely recovered and become a useful Member  
 to Society. During the whole Winter I have oc-  
 cupied myself with Mathematics, History  
 and Italian not to talk of Mr depe's Lessons  
 which I have studied for myself. I hear  
 Mr depe

is to have Mr. Koppé's Place. If it is the case I  
 beg you Dear General to make him my Congratu-  
 lations on the Occasion though I fear the State will  
 not agree with this Great being too weak to proceed  
 so often as this situation there will oblige him.  
 My Compliments Dear General to your son whom  
 I am glad to hear is quite well now and to  
 all the Gentlemen with my Brothers. I ever  
 remain

Dear General

Your much obliged

Hiers April 19 1791 Augustus Frederick
