

Sept. 16 1811

(891)

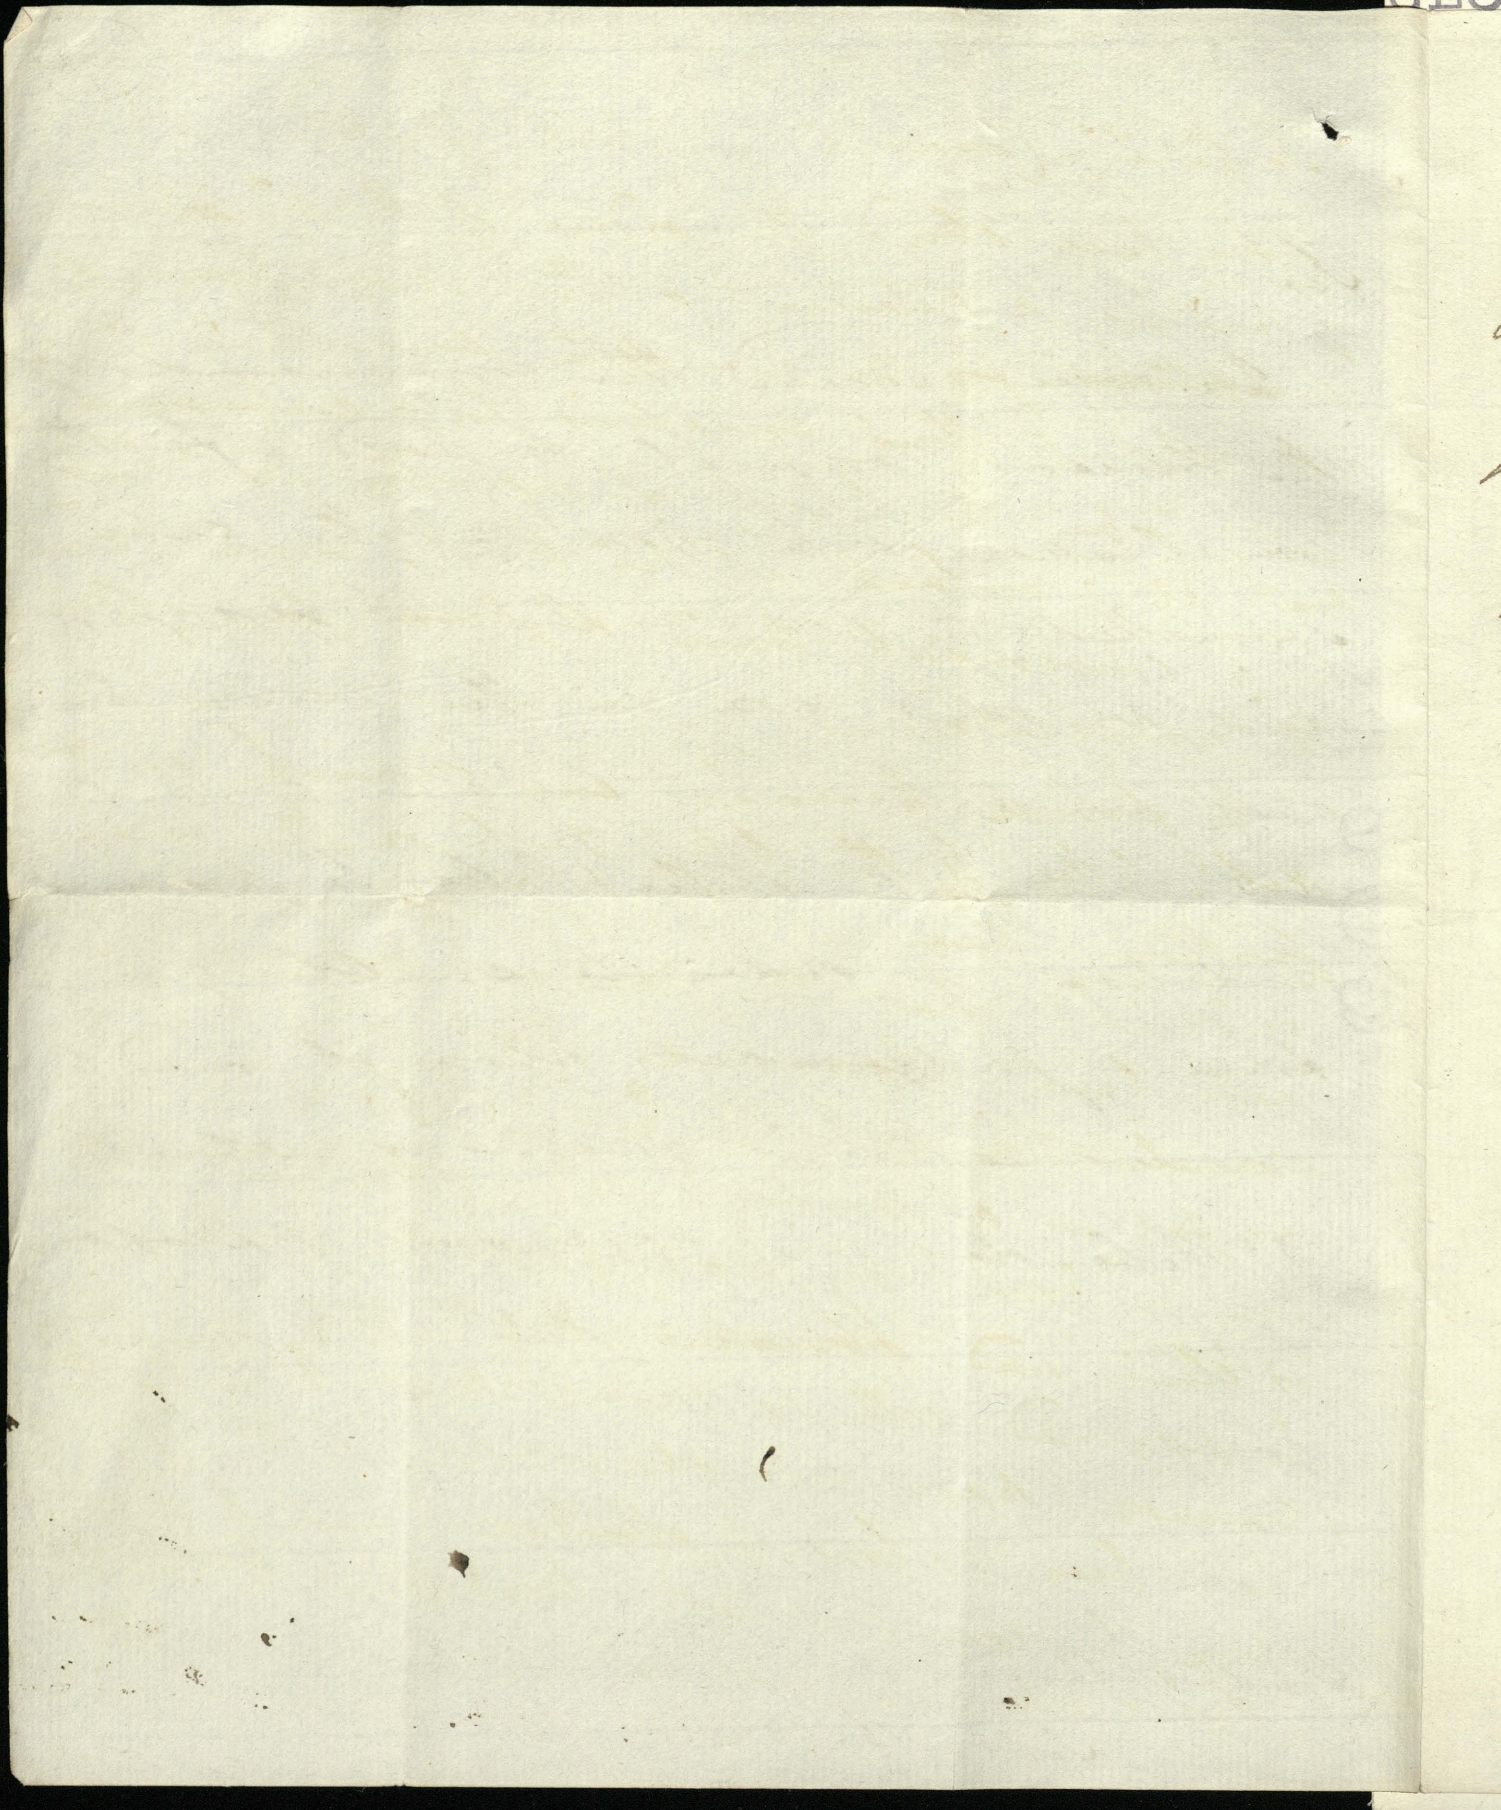

Sir

(892)

We have received the commands of the Queen's Council to hold a further consultation with you on the case submitted to you on the 4th of August, and we send you in the mean time what we believe to be an accurate representation of the Patient's present condition, in order to enable you to form a judgement upon it - and to answer certain questions which Dr Heberden is desirous of proposing to you. We are, Sir, with respect
yours

Windsor Castle.

Sept. 16. 1811.

To the 2^d. Council - Sept. 17. 1811.

We have obey'd the orders of H. M. Council
by sending a statement of the King's present
symptoms for the use of the consulting Phys:
previous to their meeting for a conference -
& we take the liberty of suggesting that Sunday
next at 2 o'clock at Sir H. H. Curzon's would
be a convenient time & place for holding
the consultation -

We forbear to make any remark on the
Rev. Letter to the M^d of P. on this occasion
further than by stating, that we are still
astonish'd that the present moment should
have been chosen as that in which a
consultation with the Q^r. Phys. w^d be most
useful - a moment w^h whatever little
can be done by management (as it is call'd)
is clear and obvious, & w^h must necessarily
be suggest'd with so much more ease by the
common sense and observation of the Phys: who
have been so long in attendance upon H. M. than
even by consummate wisdom in the consulting
Phys: who have not had such advantages -
H. H. M^d: J. W. David Dundas
