W. R. H. M. Duke

of Clarence

Dear Brother,

I have this afternoon received your
letter of yesterday and intended writing before I go to bed to Dr.
Cole relative to Lord Junville.

On the subject of Amelia I must observe that since I have
been here she certainly has been progressively better and we
all hope it will continue: her looks have astonished me after
such a length of confinement and such discipline her ap-
-pearance is really wonderful: she is cheerful and enou-
-rages conversation and is anxious to wait a few days and
set out for Windsor: Heaven the Apothecary assured me
the inflammatory symptoms were subsiding fast and
he had every reason to hope and believe Amelia might leave

Was with perfect safety on Thursday last: ^{the} this idea gives
her great pleasure and I am of opinion she is inclined to remain
here all the evening next and was much pleased to find
Pope would not be here till next Tuesday in which case
she cannot leave this place till Friday last: ^{the} as the
is against travelling on the Sunday: she is to sleep at the same
place as she did in coming down here and of course will not
reach Windsor till the 7th last: I shall attend her to fe-
-veral farts and then push on so as to reach Windsor at
noon on the seventh: these are the present plans which
both hope and believe will be executed: should any thing take
place I shall write without fail: otherwise advise and
ever believe me,

Yours most sincerely

William
